#### **GENERAL INFORMATION**

- A bachelor's degree in English is very broad and is sufficient for entry level positions in business and industry, as well as in areas such as entertainment, radio and television commentary, and museum work. Because English can lead to many different career paths, it is important to identify an area of interest and be planful about gaining the right skills, experience, and credentials to enter that field.
- A major in English is also good preparation for continued graduate or professional training in areas such as English, law, political science/government, public administration, communications, religious studies (e.g. seminary).
- Be proactive, determined, assertive, and confident in order to secure freelance writing opportunities. Writers typically experience many rejections for each piece that is accepted for publication. Save samples of written work to be used for a portfolio. Cultivate other career opportunities in order to supplement a freelance writing income.
- Obtain additional areas of expertise such as journalism, broadcasting, technical writing, or politics for specialized positions.
- Conduct informational interviews or shadow professionals in careers of interest to learn more about their jobs.
- Join relevant professional associations. Attend their conferences and read their journals.
